

**MTF Summer 2022 Meeting
Medicare/SHINE Q&As
July 21, 2022**

Q1. Can a Medicare beneficiary who is on a Medicare Savings program also receive the giveback benefit or would they not be eligible because the premium is already being paid?

A1. To be eligible for a give back plan, policyholders must meet specific criteria. You must be enrolled in Medicare Part A and Part B and pay your own premiums. This means that if your premiums are currently being covered by a state or local program, you will not qualify.
